Forward-looking Information

The information, statements, forecasts and projections contained herein reflect the Company's current views with respect to future events and financial performance. These views are based on assumptions subject to various risks. No assurance is given that these future events will occur, or that the Company's assumptions are correct. Actual results may differ materially from those projected.

Petroleum Reserves Information

In this presentation, the Company discloses petroleum reserves that are not included in the Securities Exchange and Commission of Thailand (SEC) Annual Registration Statement Form 56-1 under "Supplemental Information on Petroleum Exploration and Production Activities". The reserves data contained in this presentation reflects the Company's best estimates of its reserves. While the Company periodically obtains an independent audit of a portion of its proved reserves, no independent qualified reserves evaluator or auditor was involved in the preparation of reserves data disclosed in this presentation. Unless stated otherwise, reserves are stated at the Company's gross basis.

This presentation may contain the terms "proved reserves" and "probable reserves". Unless stated otherwise, the Company adopts similar description as defined by the Society of Petroleum Engineers.

Proved Reserves - Proved reserves are defined as those quantities of petroleum which, by analysis of geological and engineering data, can be estimated with reasonable certainty to be commercially recoverable, from a given date forward, from known reservoirs and under current economic conditions, operating methods, and government regulations.

Probable Reserves - Probable reserves are defined as those unproved reserves which analysis of geological and engineering data suggests are more likely than not to be recoverable.

The background features a collage of three images related to oil and gas operations. The top left shows an offshore platform with tall distillation columns and a flare. The bottom left shows a perspective view of a long, brightly lit walkway on an industrial facility. The right side shows an aerial view of a large offshore platform with multiple processing modules and a flare, connected to a smaller vessel by a long pipeline.

PTTEP Introduction

PTTEP – E&P arm of the PTT Group

Performing a pivotal role in Thailand's Oil & Gas exploration and production

Government
of Thailand

63.3%¹

Thailand's National
energy company

65.29%²

Largest oil & gas producer in Thailand

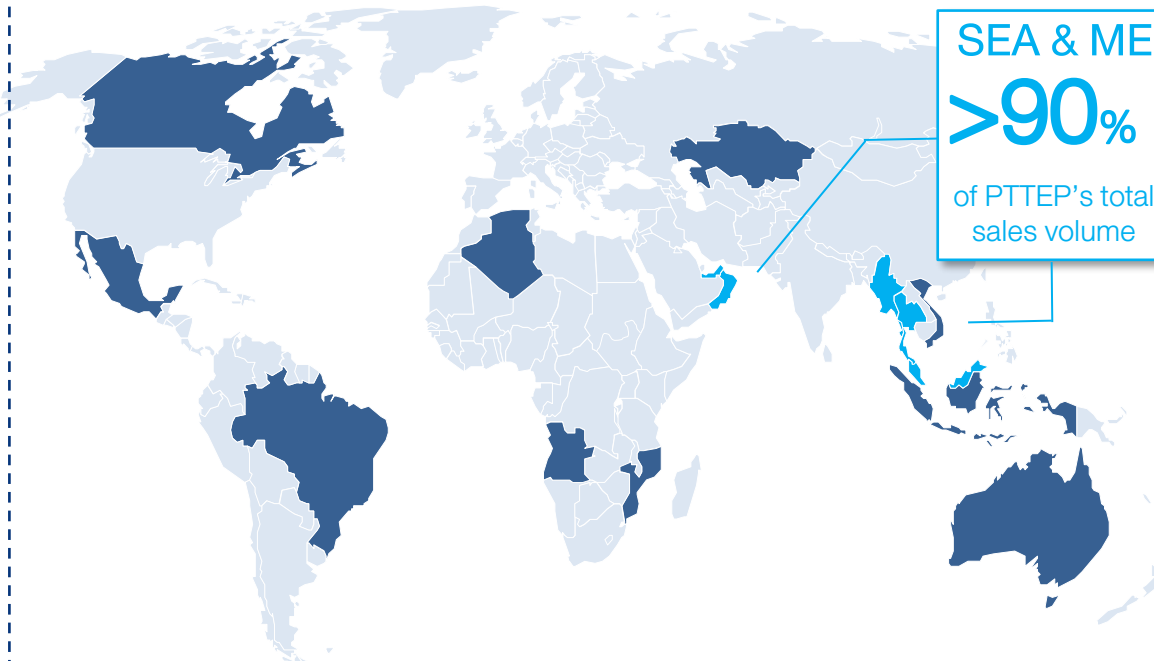

Market Cap over 14.6 Billion USD³

77% of PTTEP's sales volume sold to PTT

~13 USD/BOE average cash cost

Gas Liberalization in Thailand

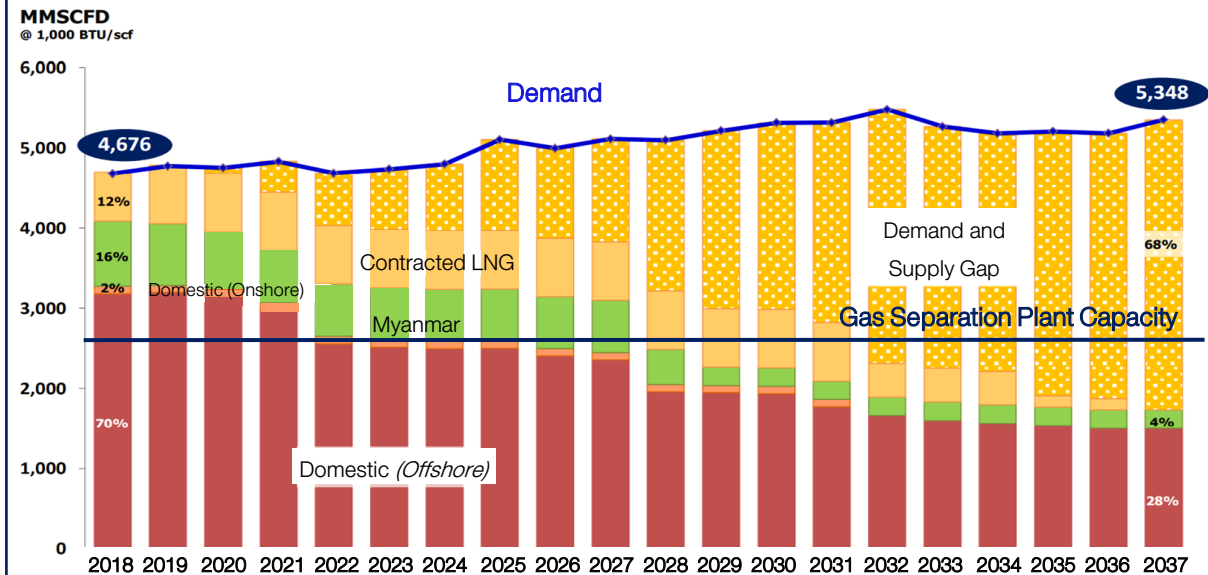

Thailand's Gas Market Structure Phase 2

Transitioning towards a liberalized market

Source: FGE report, 16 April 2021

Thailand Gas Demand and Supply

Source: Gas Plan 2018, Energy Policy and Planning Office, October 2018

- PTT will continue to manage existing gas supply, **Old Supply**, with priority to feed Gas Separation Plant given to gas from Gulf of Thailand. Main gas contributors would be G1/61 & G2/61 projects.
- New shippers will be allowed to import LNG, as **New Supply**, to feed on-grid and off-grid power plants and industries.
- PTTEP will compete in the New Supply market via PTT GL, a joint venture company between PTT and PTTEP. Expecting approval in Q2/2021.

The background features a collage of three images related to oil and gas operations. The top left image shows an offshore platform with tall towers and a large flare emitting a bright flame. The bottom left image is a perspective view of a long, brightly lit walkway with railings on an industrial facility. The right side of the collage is an aerial view of a large offshore platform with multiple processing modules and a long pipeline extending into the dark blue sea, with a small support vessel nearby.

Operations Update

Key Achievements in Malaysia

Sabah H – First Gas

- 1st gas production delivered to PFLNG2 in early Feb 2021. Ramping up to full capacity 270 MMSCFD
- Contributing ~15 KBOED to PTTEP's sales volume in 2021 and ~20 KBOED in 2022

Multiple Exploration Successes

Appraisal well result beyond expectation

- **SK410B (LLB)** – production capacity upside to 800–1,000 MMSCFD, with FID planned in 2022

New Petroleum Discoveries

- **SK417 (Dokong)** – high quality gas discovery with additional well drilling in 2021, presenting future synergy development opportunities with SK410B
- **SK405B (Sirung)** – oil and gas discovery with appraisal well planned in 2022 to assess upside potential

Assets Transition in Thailand

G1/61 (Erawan)

Continuously and closely coordinated with government for minimal impact from site access delay. The first priority on country's energy security.

G2/61 (Bongkot)

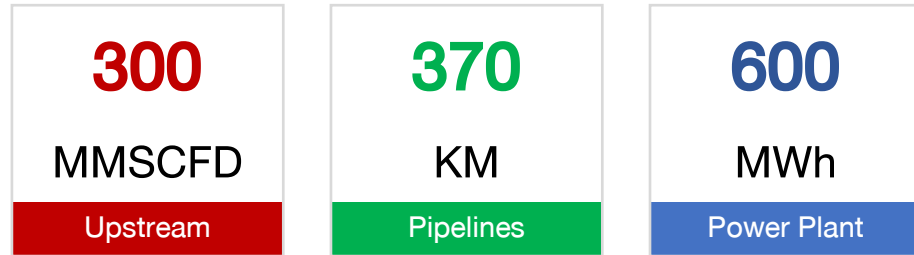

- On track – deliver gas at the minimum volume stated in PSC 2022@200MMSCFD 2023@700MMSCFD
- New production platforms installation in 2021 and 2022

Stronger Presence in Oman

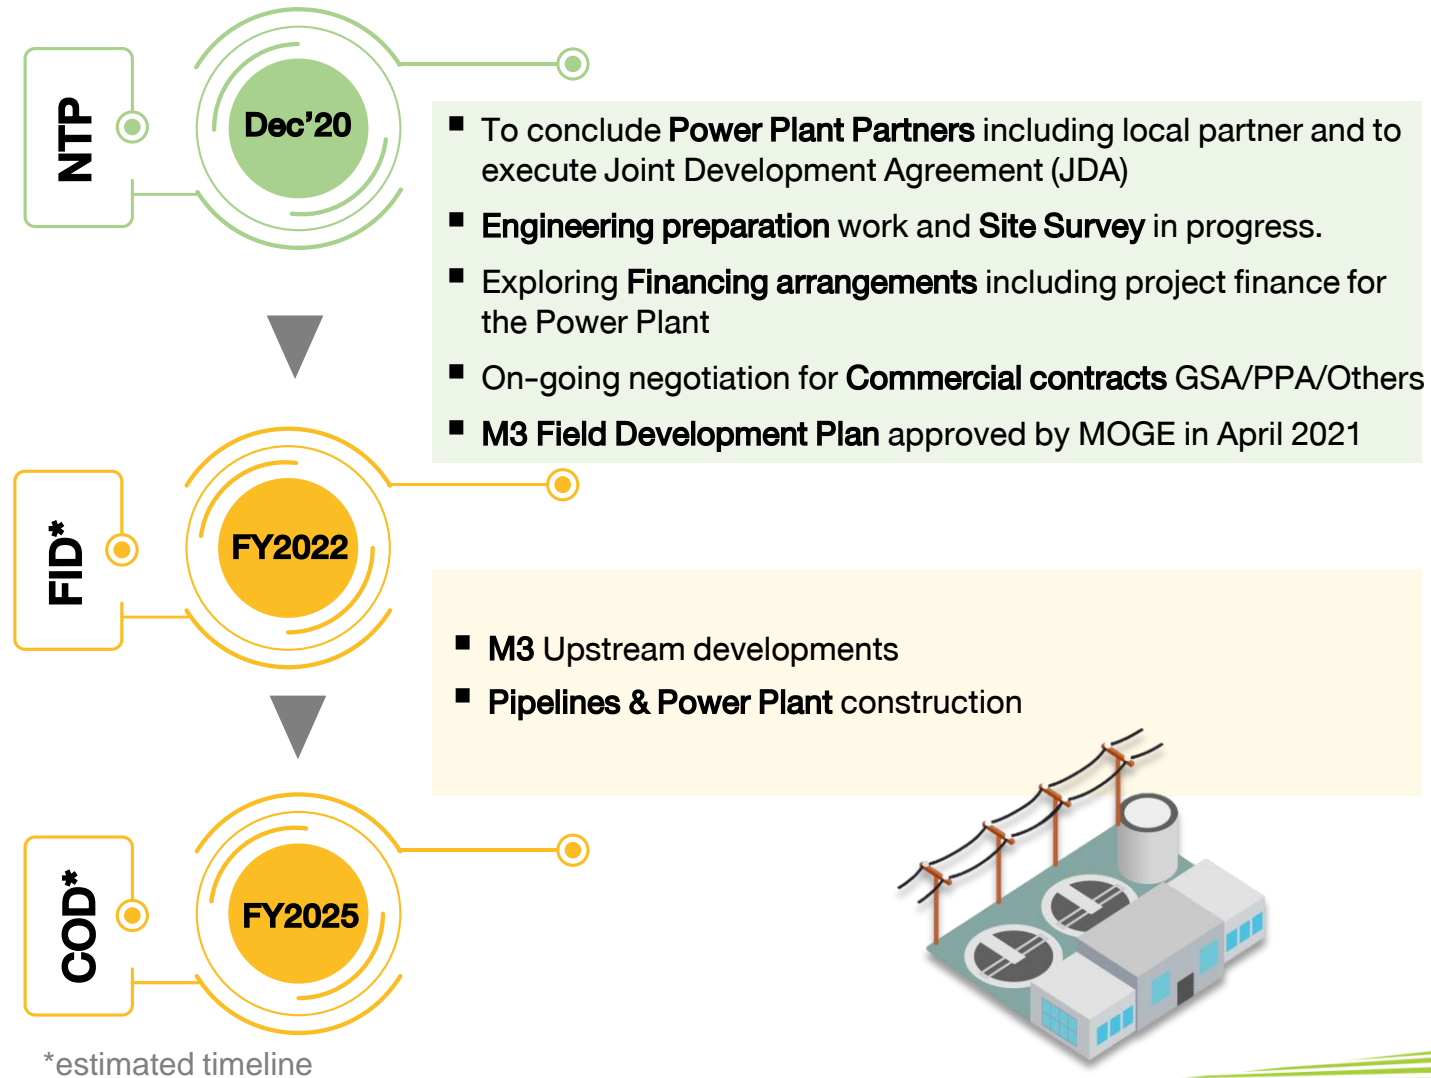

- Completed the acquisition of 20% interest in Block 61, Oman on 23 March 2021
- Contributing ~29 KBOED to PTTEP's sales volume in 2021 and ~52 KBOED in 2022

New Business – Gas to Power

- ✓ **Upstream:** Expanding gas value chain into Power business by commercialization of gas supply from M3 and M9 (Zawtika) fields for power plant project
- ✓ **Pipelines & Gas Stations:** Offshore and onshore pipelines connecting Kanbauk, DawNyien, Kyaiklat and gas stations.
- ✓ **Power Plant:** Gas-fired Combined Cycle Power Plant (CCPP) in Kyaiklat connecting with 230kv transmission line. 100% sold to EPGE's national grid.

New Business – ARV

Note: Excludes Hybrid bonds

Unit: USD Millions or equivalent after cross currency swap

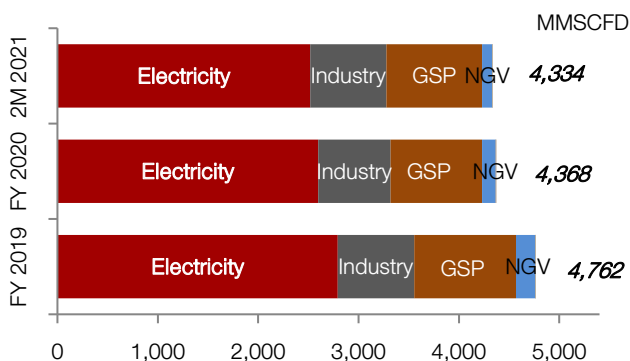

Thailand Energy Overview

Natural Gas Supply

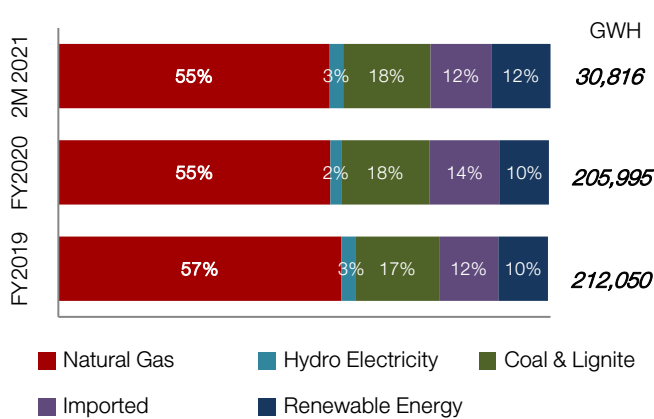

- Recovering energy demand, but still lower than pre COVID-19 level.
- Higher domestic supply with less LNG imports and a slight decline from Myanmar piped gas imports due to natural decline

Natural Gas Consumption

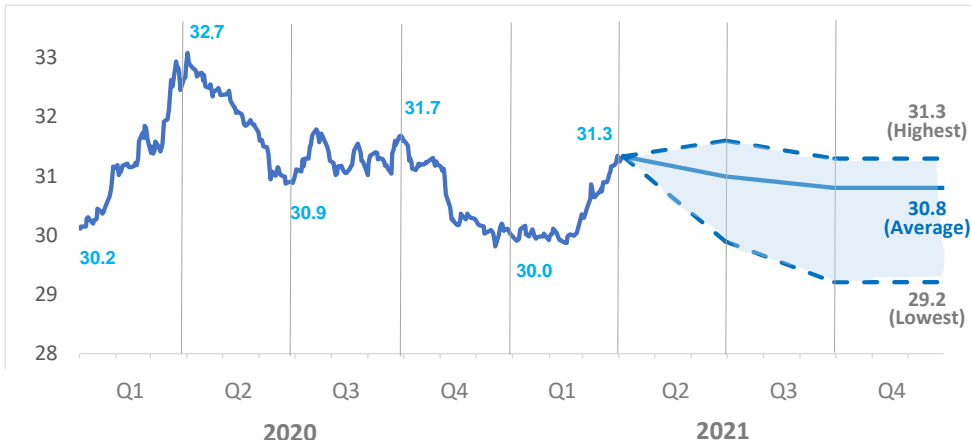

Source: EPPO

Electricity Generation

Exchange Rate Movement (THB/USD)

Consensus on the exchange rate mostly depends on

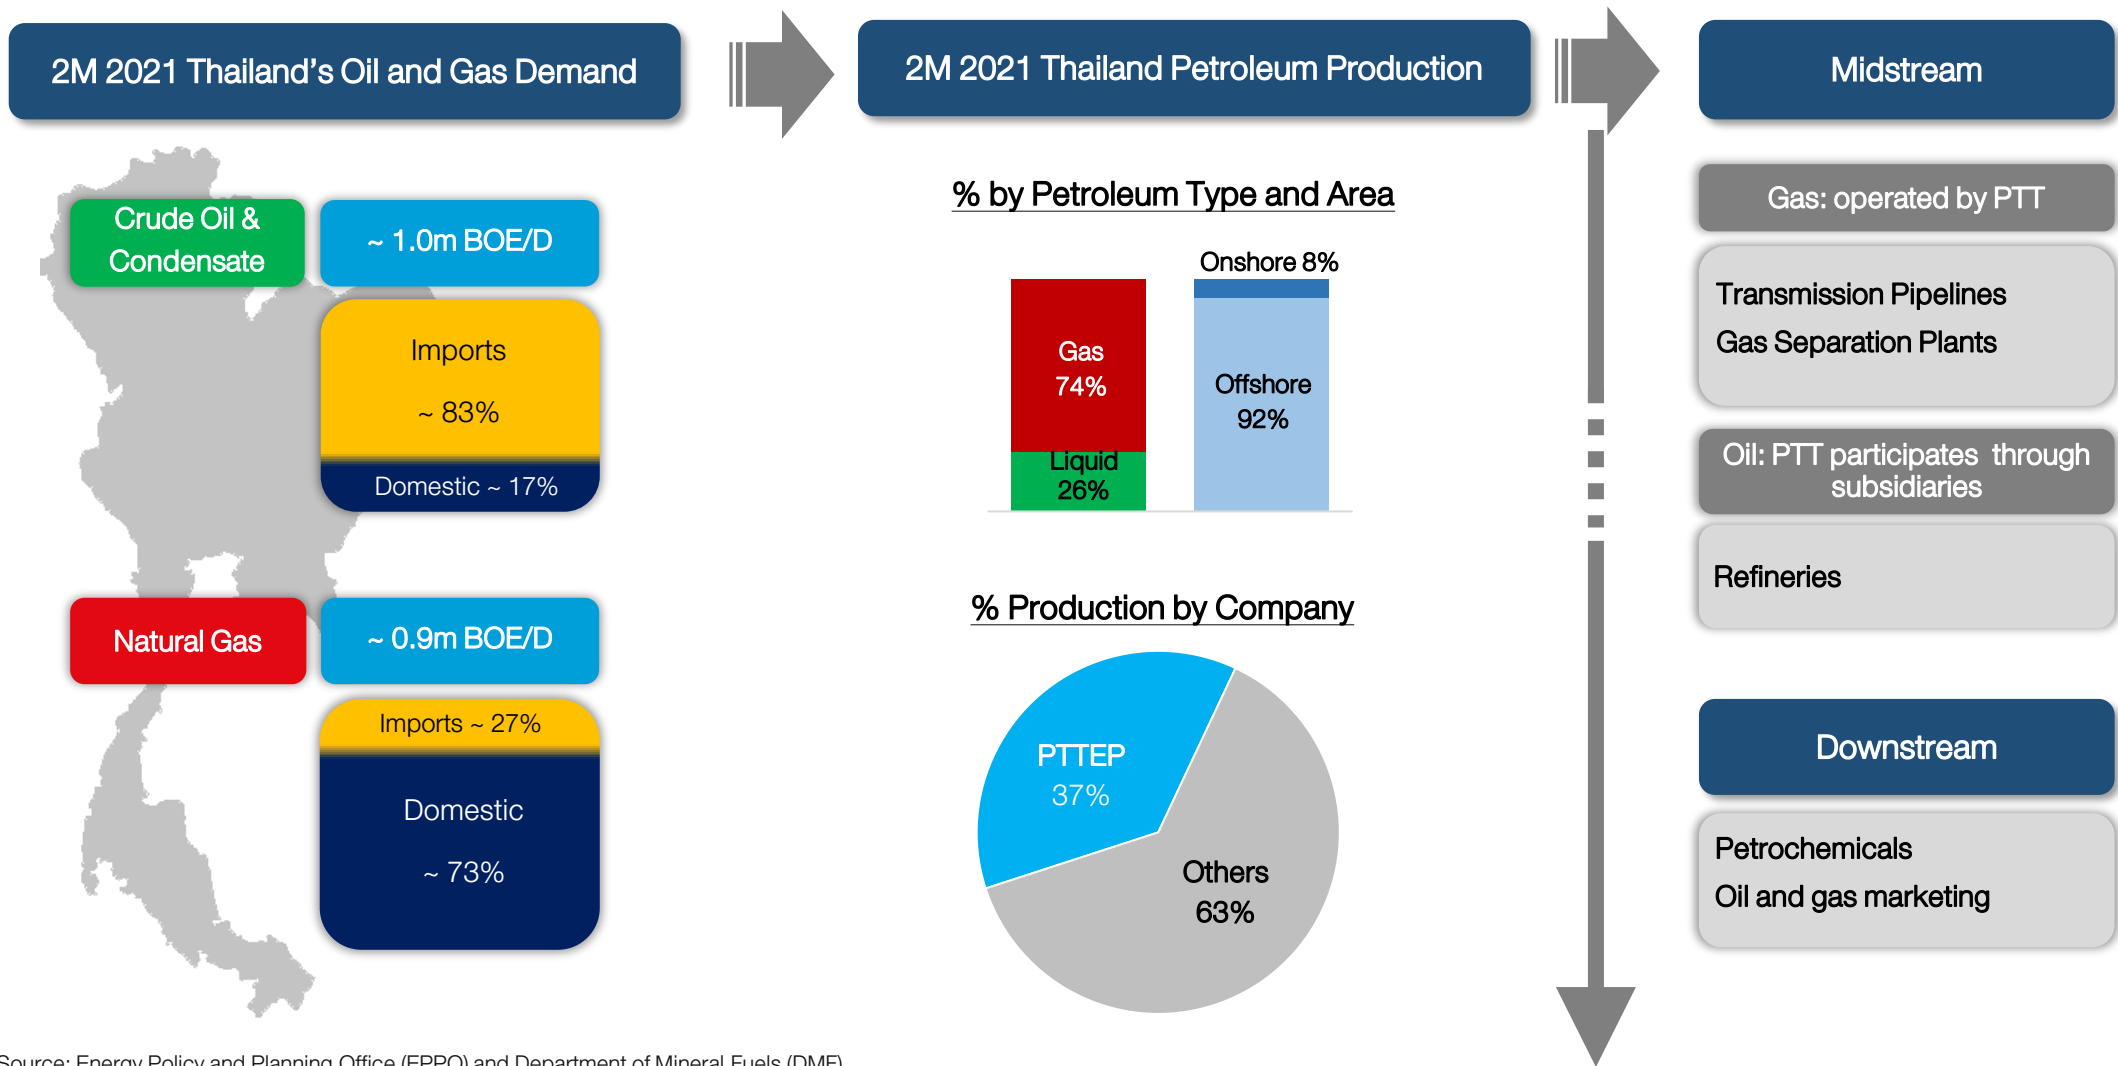

- New wave of Covid-19 infections and efficacy of Covid-19 containment measures
- The recovery of tourism sector in Thailand and global economic recovery
- Sustained and coordinated government policy support

Source: Bank of Thailand, Bloomberg

Forecast based on Bloomberg Consensus as of 31 March 2021

Thailand's Energy Value Chain

PTTEP contributes over 1/3 of Thailand's petroleum production

2020 by Geography

2020 by Product Type

Diversified international portfolio

Central Asia

- First presence in Kazakhstan:**
- Production: Dunga onshore oil field from the acquisition of Partex in 2019

Oil sands

Oil

Thailand

PTTEP's core production base

- 72% of total sales volume
- Key producing assets include Bongkot, Arthit, Contract 4 and S1
- Bongkot (G2/61) and Erawan (G1/61) are in transition process to ensure production continuity

North & South America

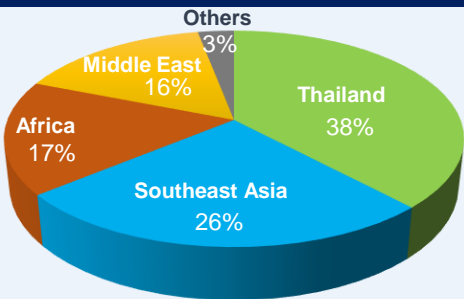

- Opportunities in an early phase:**
- Deepwater exploration in Brazil and Mexico with prominent and prudent operators

Oil

Oil

Book Value of Assets by region

Total assets USD 23.3 billion

As of Mar 2021 (including Oman Block 61)

Africa

An area for growth, key projects include:

- Production: Algeria's Bir Seba oil field with current flow rate of approximately 17 KBPD
- Development : Algeria's Hassi Bir Rakaiz with target 1st phase production in 2021 and Mozambique Area 1 with target first cargo in 2024

Middle East

Strong presence in UAE and Oman:

- 3 offshore exploration blocks in UAE, partnered with experienced operator
- 4 onshore blocks in Oman including PDO (Block 6), largest producing oil asset, and Block 61, largest tight gas development
- Stake in OLNG

Piped Gas

Oil

GAS/LNG

Southeast Asia

Second heartland to PTTEP

- 22% of total sales volume mainly from Malaysia and Myanmar
- 3rd Largest by resources size in Malaysia with significant gas discovery in Sarawak SK 410B Project
- Other producing assets in Vietnam (oil) and Indonesia (gas)

Australia

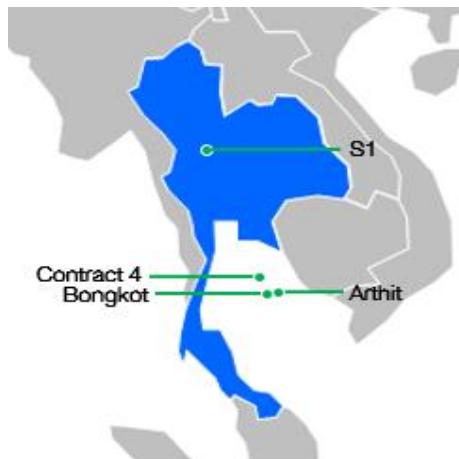

Potential gas development

- Sizable undeveloped gas resources in Timor Sea

Thailand, Myanmar and Malaysia

“Coming Home” to maintain strong foundation with full expertise

Thailand

● Production / Ramp-up Projects

Bongkot (66.6667% WI)

- Average natural gas and condensate sales volume of 930 MMSCFD and 22 KBPD in Q1/2021

S1 (100% WI)

- The largest onshore crude oil production field in Thailand with Q1/2021 average crude oil sales volume of 28 KBPD

Arthit (80% WI)

- Average sales volume in Q1/2021 was 243 MMSCFD of natural gas and 11 KBPD of condensates

Contract 4 (60% WI)

- Average sales rate of 420 MMSCFD for natural gas and 16 KBPD for condensate in Q1/2021

Myanmar

- 3 producing gas fields supplying gas to both Thailand and Myanmar: Yadana, Yetagun*, and Zawtika
- Operate Zawtika project, brought online in March 2014 with current gas supply of 335 MMSCFD in Q1/2021

Project Status

Production

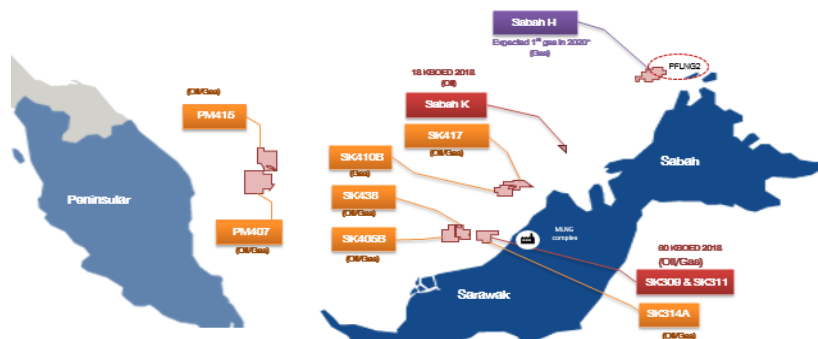

- Zawtika (80% WI)
- Yadana (25.5% WI)
- Yetagun* (19.3% WI)

Appraisal

- M3 (80% WI)

Note: Yetagun production has been temporarily ceased until further notice due to depletion of gas production at the field

Malaysia

Production

Block K Project :

Kikeh (56% WI), Siakap North-Petai (SNP) (22.4% WI) and Gumusut-Kakap (GK) (6.4% WI)

- Average production volume in Q1/2021 was 29* KBPD of crude oil and 29* MMSCFD of natural gas

SK309 and SK311 Project : (59.5% WI)

For East Patricia field (42% WI)

- Average production volume in Q1/2021 was 164* MMSCFD of natural gas and 17* KBPD of condensates and crude

Block H Project :

Rotan field (56% WI) Remaining Area (42% WI)

- First gas completed early February 2021 with average production volume in Q1/2021 at 81 MMSCFD of natural gas
- Full capacity at 270 MMSCFD

Exploration

Sarawak SK410B Project (42.5% WI)

- Multi TCF significant discovery
- Expected Final Investment Decision (FID) announcement in 2022

Sarawak SK417 and Sarawak SK405B projects

- New Petroleum discoveries with additional well drilling to assess upside potential

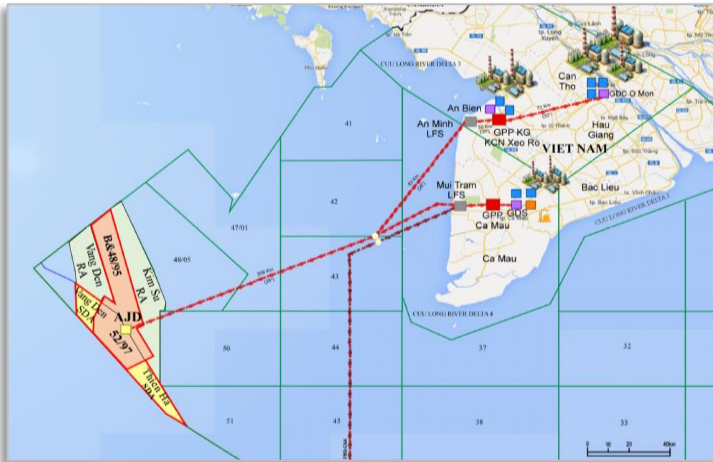

For Block K, gross production is net off utilization

Note: WI – working interest

Other South East Asia countries

Expanding foothold in the region

Vietnam and Indonesia

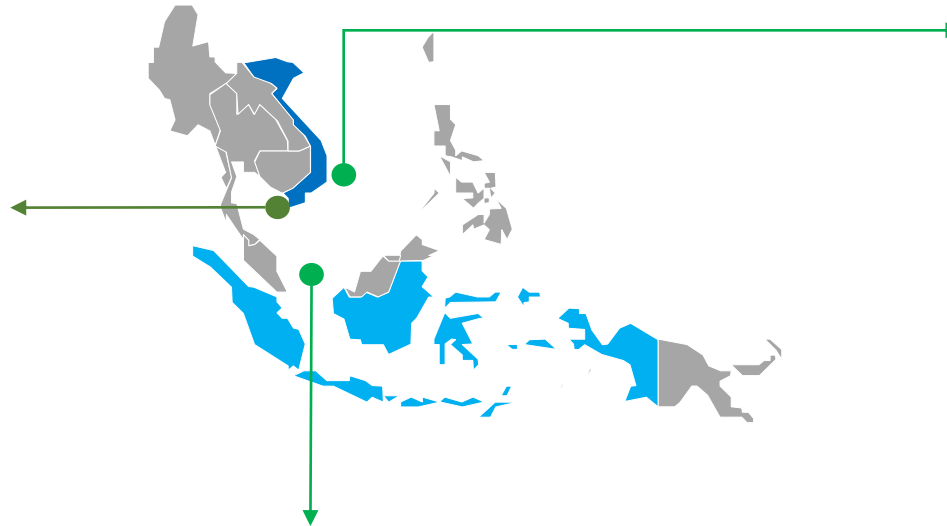

Southwest Vietnam

- Vietnam B & 48/95 (8.5% WI)
- Vietnam 52/97 (7% WI)

- Field Development Plan was approved by Government
- The project is currently in the negotiation process on commercial terms to put forward FID
- First production target by end of 2024, and ramp up to full capacity of 490 MMSCFD

- Production projects
- Pre sanction projects

Vietnam 16-1 (28.5% WI)

- Average sales volume of crude oil was 12 KBPD in Q1/2021
- The project is preparing the drilling of additional development wells in order to maintain the production level in 2021.

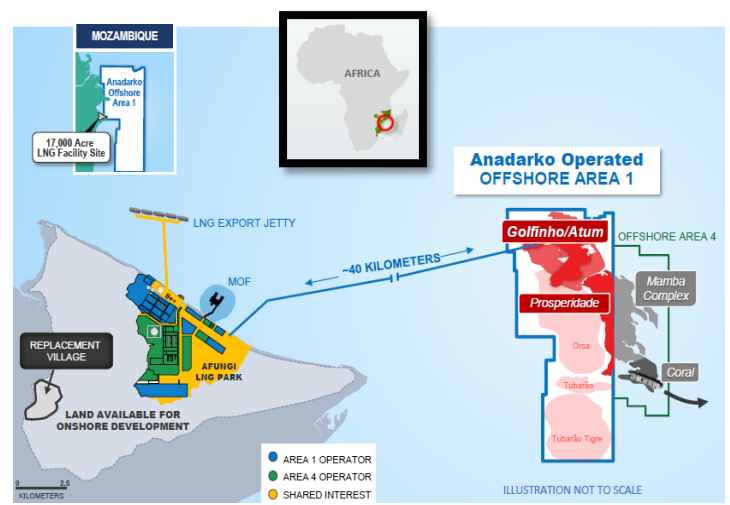

Natuna Sea A (11.5% WI)

- Average sales volume of natural gas was 238 MMSCFD in Q1/2021

Mozambique Area 1

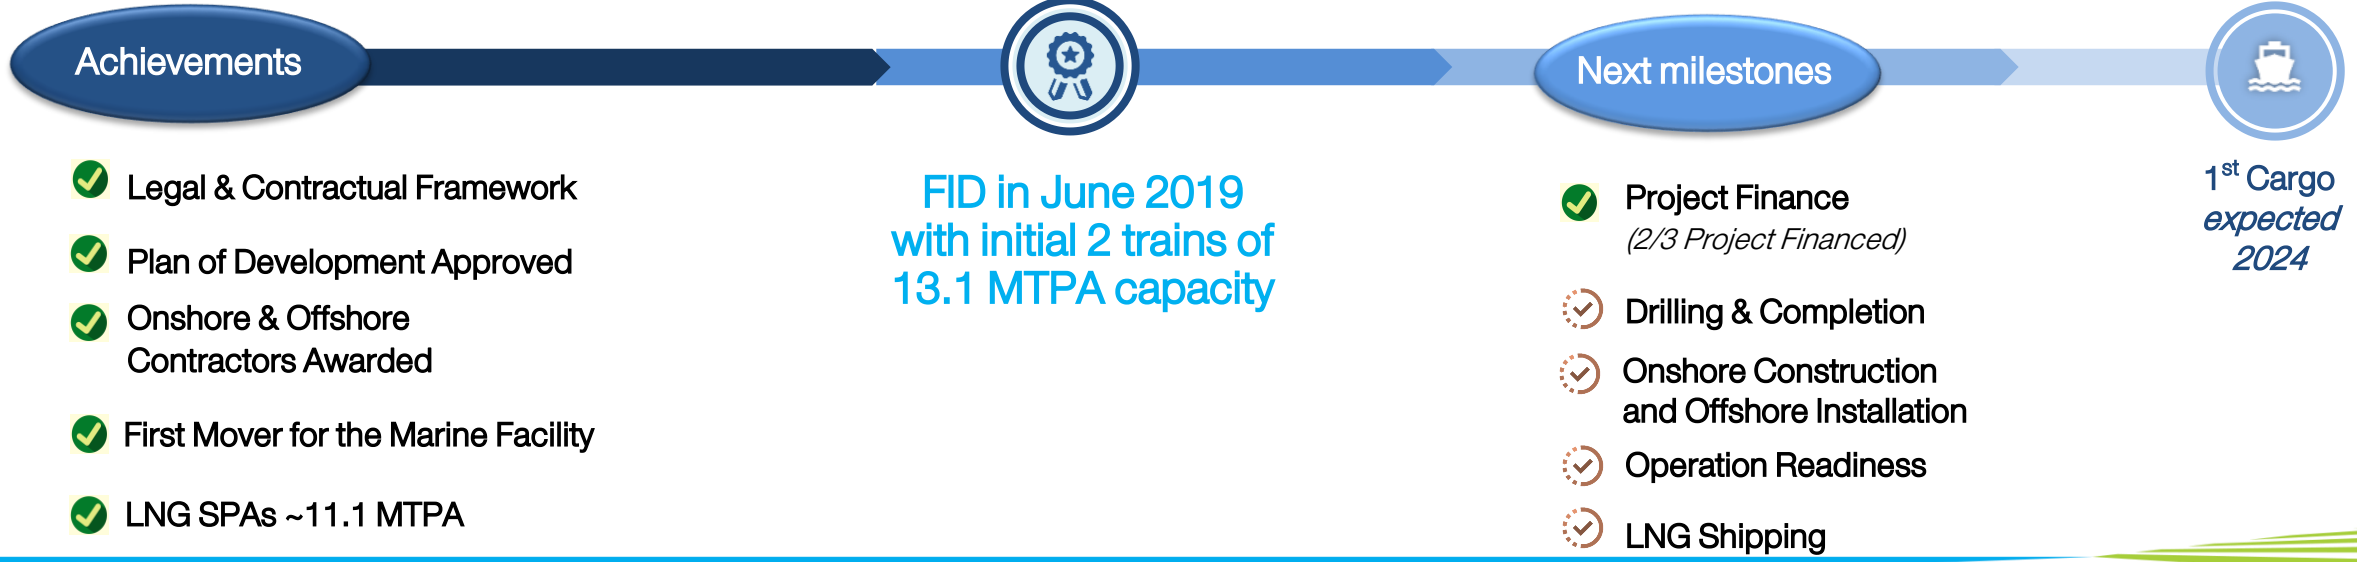

On the path of unlocking value from world class LNG asset

Substantial recoverable resources of approximately 75 tcf
with scalable offshore development expending up to 50 MTPA

Location and Cost Advantage

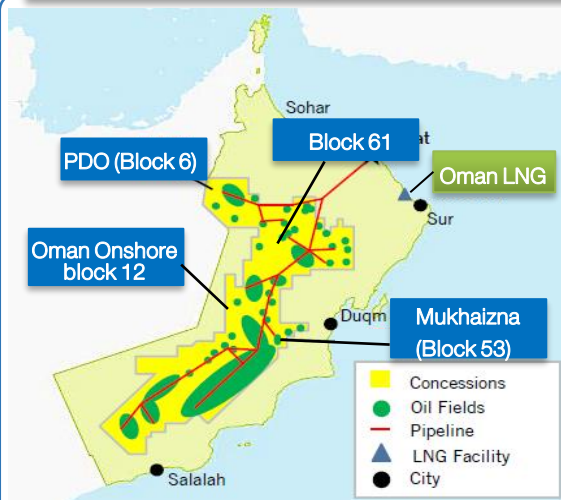

- Close proximity to shore
- High quality reservoirs
capable of flow up to 200 mmcf/d per well
- Access to Asian and European markets

The Middle East

Access to the largest oil asset in Oman and mega Midstream Complex

Oman

PDO (Block 6)

- Largest asset covering around 1/3 of the country
- Long-life asset, produced only 15% of reserves in-place
- Multi-field oil production volume: 624,314 BPD (69% of Oman production)
- Operated by Petroleum Development of Oman (Joint Operating Company)

Mukhaizna (Block 53)

- Largest single onshore producing field in Oman
- Oil production volume: 94,227 BPD (10% of Oman production)
- Operated by Occidental Petroleum (47% interest)

Block 61

- Largest tight gas development in Middle East
- Gas production capacity: 1,500 MMSCFD
- Operated by BP Exploration (Epsilon) Limited (40% interest)

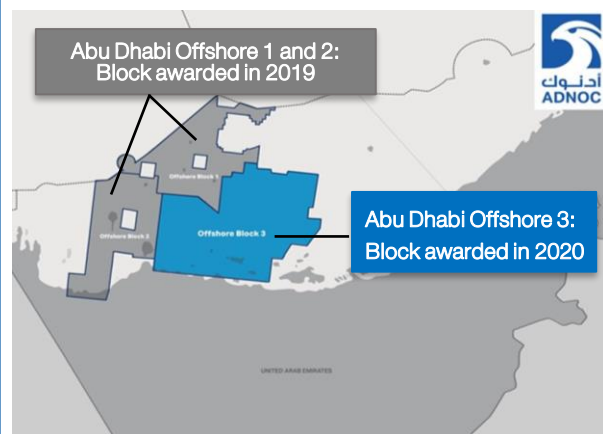

Block 12

- Located onshore central part of the Sultanate of Oman
- Signed agreement with Oman's Ministry of Oil and Gas (MOG) for exploration and production rights in February 2020
- Operated by Total E&P Oman Block 12 B.V. (80% interest)

Oman LNG

- The only LNG facility in Oman
- Processing capacity 10.4 MTPA
- Contracted LNG sales to international buyers: Japan and South Korea
- Government of Oman 51% (Operator)

UAE

Abu Dhabi Offshore 1,2 and 3

- High potential prospective resources with significant sizeable discoveries
- Located North-west of Abu Dhabi Emirates, United Arab Emirates
- Granted the award for exploration in January 2019 - 2020
- Operated by Eni Abu Dhabi B.V. (70% interest)

ADNOC Gas Processing (AGP)

- One of the largest gas processing complexes in the world (total capacity of 8 BCFD)
JV: 3 plants with capacity of 1.2 BCFD
Adnoc: 2 plants with capacity of 6.9 BCFD
- Essential to Abu Dhabi and UAE's economy
- Sizeable volumes of Propane, Butane and Naphtha offtake
- Operated by ADNOC (68% interest)

-- Entry into high potential petroleum province at exploration phase --

Deep Water Brazil

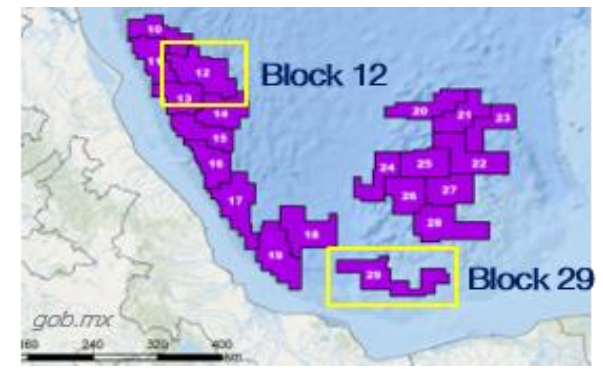

Barreirinhas AP1

- Farm-in 25% from BG Group in 2014
- Operated by Shell Brasil (65% interest)
- Four offshore exploration blocks: BAR-M-215, BAR-M-217, BAR-M-252 and BAR-M-254
- Currently waiting for exploration wells drilling permit from the government

BM-ES-23

- Acquired 20% interest from Shell in Q3 2014
- Partnered with Petrobras (65%, operator) and INPEX (15%)
- Currently evaluating the petroleum potential for further development

Gulf of Mexico, Mexico

Deep-water with high petroleum potentials and attractive fiscal regime

Mexico block 12 (2.4)

- Non-operating partner with 20% participating interest
- Located in the Mexican Ridges, western Gulf of Mexico
- Currently evaluating petroleum potential and preparing for an exploration well drilling in 2021

Mexico block 29 (2.4)

- Non-operating partner with 16.67% participating interest
- Located in the Campeche, southern Gulf of Mexico
- Made two successful deep-water oil discoveries with good quality reservoirs in May 2020
- The appraisal plan and exploration plan were approved by the Mexican regulators (CNH) on 25 March 2021.
- Preparing for exploration well and appraisal drilling.
